Moving towards credible and open research

Malika Ihle and Sarah von Grebmer zu Wolfsthurn

19/10/2026

Prerequisites - EDIT

> **!** Important
>
> Before completing this session, please carefully read about the prerequisites.

Prerequisite	Description	Link/Where to find it
UNESCO Recommendations on Open Science	For a first overview of Open Research, particularly pp 6-19	Download here
Introduction to reproducibility and replicability	Basic familiarity with current challenges in research and the effects on research quality	https://lmu-osc.github.io/teaching-material-for-novices/open-research-principles/reproducibility-replicability

Presenter Notes: These are the **presenter notes**. You will find a script for the presenter for every slide. In presentation mode, your audience will not be able to see these presenter notes, they are only visible to the presenter.

For this session, it is important that you are familiar with key issues in current research, particularly around replicability and reproducibility, since this session is building up on that.

Instructor Notes: There are also **instructor notes**. For some slides, there will be pedagogical tips, suggestions for activities and troubleshooting tips for issues your audience might run into. You can find these notes underneath the presenter notes.

These are the prerequisites for this session. Before you get started on this session with your audience, you need to ensure that the audience fulfills these criteria.

Presenter Notes: The Creative Commons Attribution 4.0 International SA License, or CC BY-SA 4.0, allows others to copy, share, and adapt a work in any medium, including for commercial purposes. These permissions are broad and cannot be withdrawn as long as the license terms are followed. The main requirement is attribution: users must give appropriate credit to the original creator, provide a link to the license, and clearly indicate whether any changes were made, without implying endorsement by the original author. In addition, the ShareAlike condition means that if someone modifies or builds upon the work, the resulting material must be distributed under the same CC BY-SA 4.0 license, or a compatible one. Finally, users are not allowed to apply legal or technical restrictions, such as DRM, that would prevent others from exercising these same rights.
